## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Alnafissa (4,802,302). Alnafissa shows an ant-resistant food container having a food surface support 16 with a lower surface 18 that rests evenly on a flat surface and the food surface support 19 rising therefrom; a surrounding ant barrier 10 connected to and encircling the food surface support 16 such that any insect climbing the support 16 must walk across the ant barrier 10 which is composed of a sticky polymer trap 27 and a physical barrier 15 and a food surface 13 for holding food while being supported by the food surface support 16. The food surface 13 is a bowl, see fig. 1 having a circular rim 15 wherein the ant barrier 10 is in the circumferential recess under the bowl 13 and the food surface support 16 is a pedestal such that the bowl 13, pedestal 16 and ant barrier 10 are detachable for washing. With regards to claim 3, the food surface 11 is a tray having a flat bottom 12 with a raised rim 14, wherein the food surface support 16 is under the tray 12 and the surrounding ant barrier containing the sticky polymer trap 10 is in the recess under the raised rim 14 of the tray 12.

***Claim Objections***

Claim 1 is objected to because of the following informalities: on line 13 the word "service" should be changed to --surface--. Appropriate correction is required.

***Conclusion***
